# Economic and social integration of asylum seekers in rural areas: the example of Malles Venosta and Ortisei

Anja Marcher & Ingrid Kofler  
Institute for Regional Development

# Agenda

## 1. Introduction

- The project idea “Rural Areas for Refugees – Refugees for Rural Areas”
- Selection of the cases (PP)
- Project implementation

## 2. Methods

## 3. The example of Malles Venosta and Ortisei

1. Set concrete actions
2. Knowledge building

## 4. Conclusion

# 1. The project idea

## “RURAL AREAS FOR REFUGEES – REFUGEES FOR RURAL AREAS”

Project idea presented at the ARGE ALP competition 2016

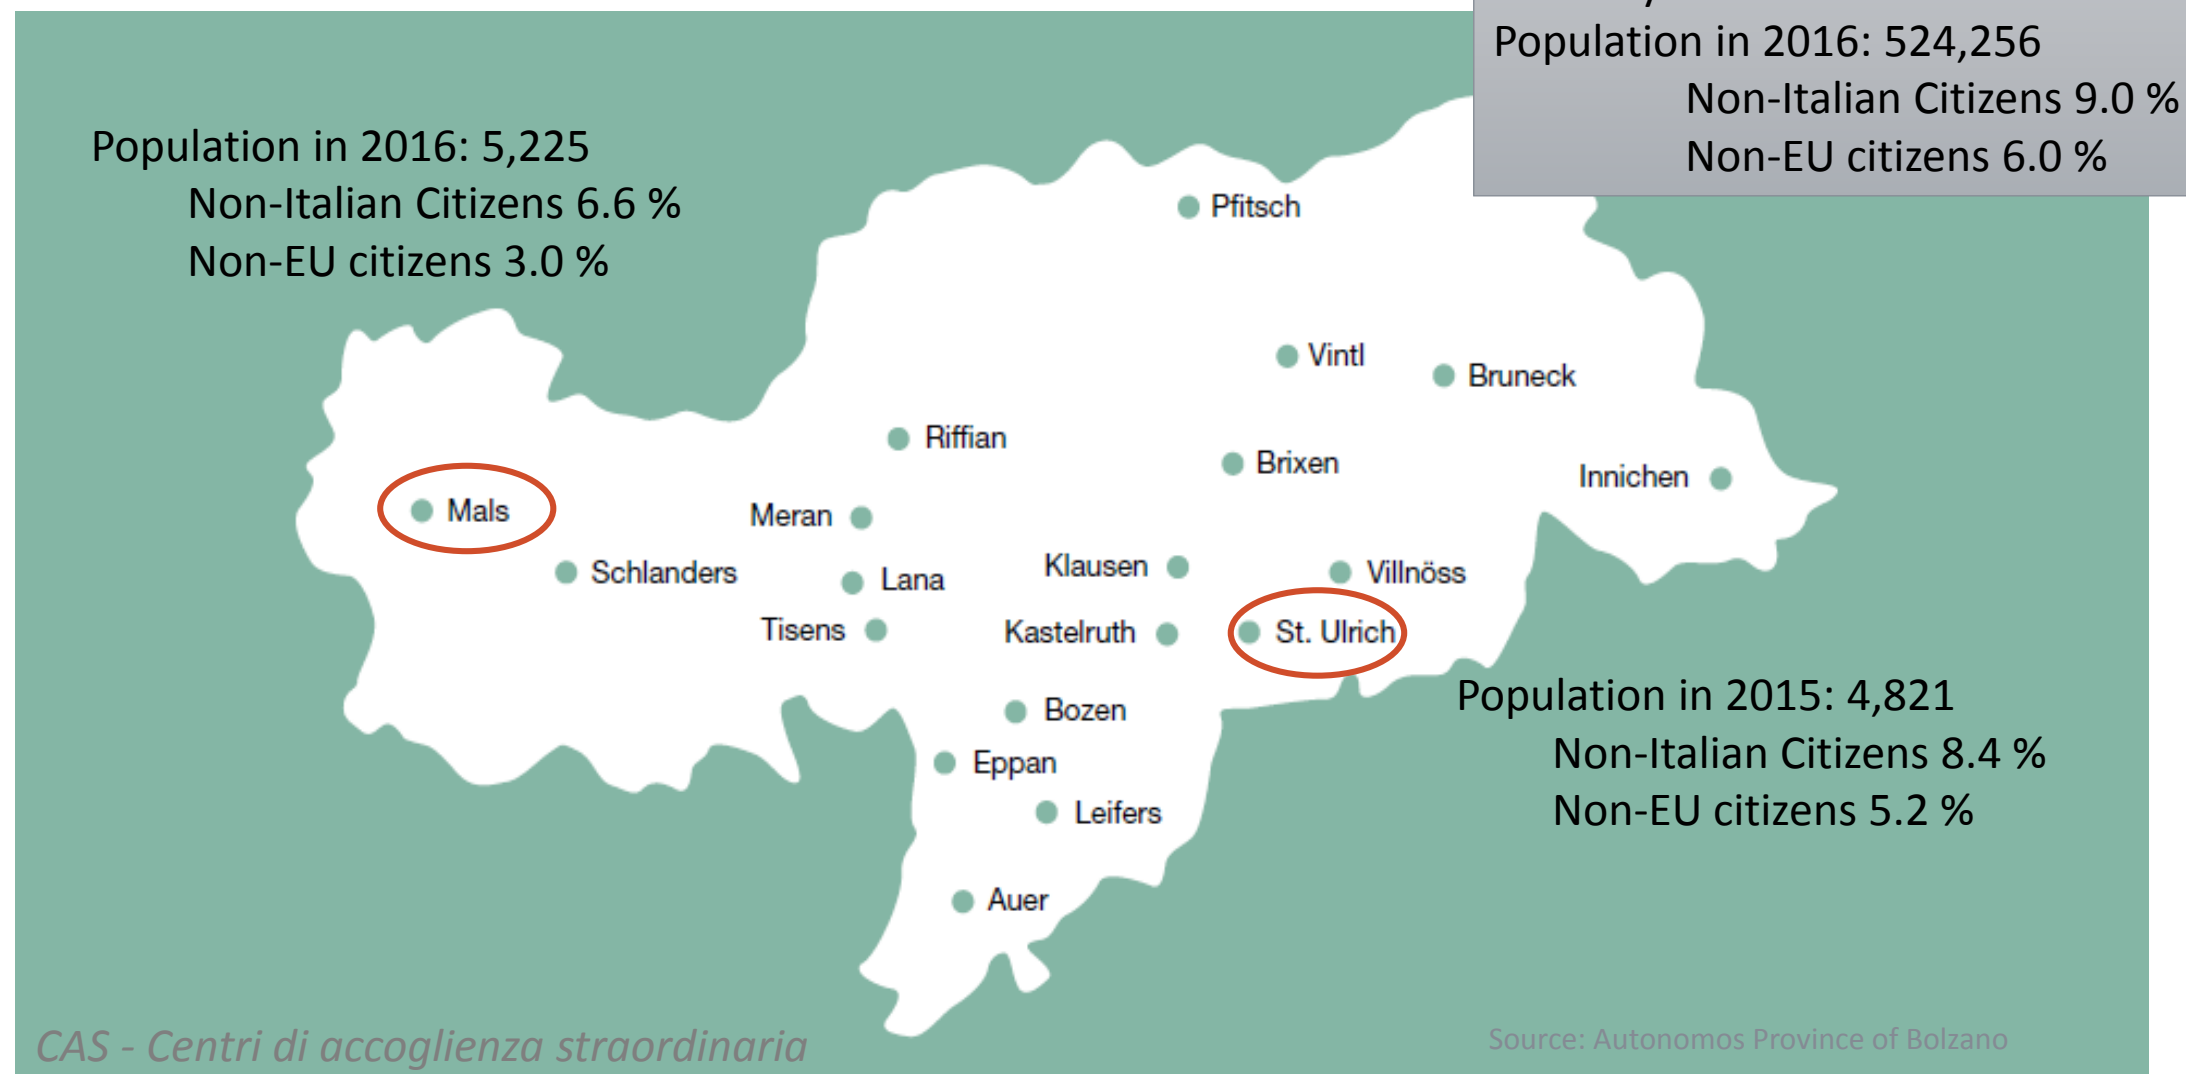

### (Main) Research Questions:

- What measures and actions should be taken / are missing to support socio-economic inclusion?  
*(set concrete actions)*
- How does labor integration of asylum seekers in rural areas work? *(knowledge building)*

### Central scopes:

1. To promote and sustain labour integration of asylum seekers in rural areas through local collaborations.
2. To support the approximation of enterprises and asylum seekers.

# 1. Selection of the cases

# 1. Selection of the cases

# 1. Selection of the cases

# 1. Project implementation

Close collaboration with local realities:

- The municipalities **Malles Venosta** and **Ortisei**
- Responsible NGO's **Caritas** and **Volontarius Onlus**
- **Eurac Research**

Objectives:

- 1. To set concrete actions:** Identification of individual needs of the communities regarding early labor integration of refugees, i.e. asylum seekers.
- 2. To expand knowledge:** Contribution to a better understanding of labor integration in rural areas and the role of social networks

## 2. Methods

### Participatory research:

- Workshops, (monthly) meetings

### Data collection:

- 5 semi-structured interviews with responsible persons
- documentation of observations (minutes of meetings, verbal remarks)
- quantitative data of the reception facilities
- Newspaper, online news
- secondary data of official sources (ASTAT, ISTAT)

### Data analysis:

- Qualitative analysis of the interviews
- Social Network Analysis (SNA)
- Software: UCINET & NetDraw

# 3. The example of Malles Venosta and Ortisei

## FIRST RESULTS

*What measures and actions should be taken / are missing to support socio-economic inclusion?*

### 1. Set concrete actions

- Identify needs
- Define activities
- Implementation

*How does labor integration of asylum seekers in rural areas work?*

### 2. Knowledge building

- Data collection
- Data analysis

*Which are the central actors in the field of labor integration at a municipal level?*

# 1<sup>st</sup> Exchange and collaboration

# 2<sup>nd</sup> Awareness raising of local enterprises

eurac  
research

VOLONTARIUS  
onlus

## Muciadives sciche lauranc

Sëira de nfurmazion per firmes

11 de auril 2017 – dala 20:30

## Asylsuchende als Arbeitskräfte

Informationsveranstaltung für Unternehmen

11. April 2017 – 20:30 Uhr

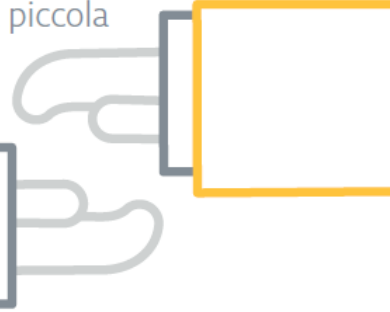

Kulturhaus St. Ulrich – Kleiner Saal

## I richiedenti asilo come risorsa lavorativa

Serata informativa per le imprese

11 aprile 2017 – ore 20:30

Casa della Cultura di Ortisei – sala piccola

# 2<sup>nd</sup> Awareness raising of local enterprises

## Asylsuchende als Arbeitskräfte

Informationsveranstaltung für Unternehmen

20. April 2017 – 20:00 Uhr

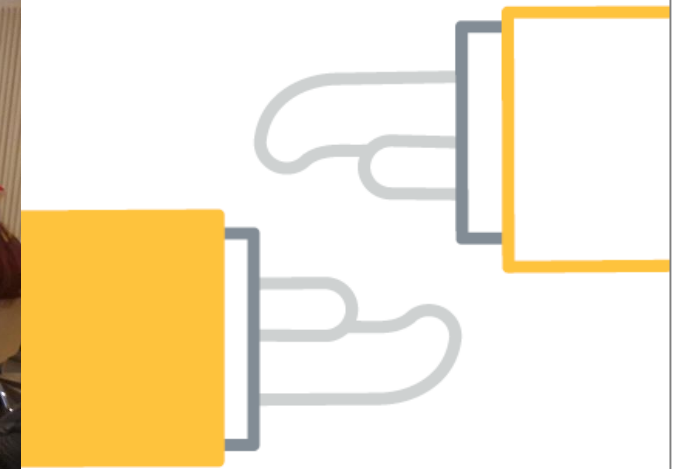

Martinsheim in Mals

## I richiedenti asilo come risorsa lavorativa

Serata informativa per le imprese

20 aprile 2017 – ore 20:00

Fondazione Martinsheim – Malles

### 3<sup>rd</sup> Concrete actions

**Ortisei:** Implementation of **specific courses** to reduce the barriers for asylum seekers to enter the labour market

End of March: **16 h course on work safety** (high risk) & certificate for 14 asylum seekers (out of 25)

**Malles:** Implementation of the **pilot project “Jobcoach”** as local counsellor for enterprises and asylum seekers/refugees

START PILOT: **18<sup>th</sup> April 2017 – 30<sup>th</sup> July 2017** (*final evaluation*)

# 3. Knowledge building

January 2016	Malles	Ortisei
Opening centre	September 2015	January 2016
N° of asylum seekers	40	25
General information	31 male – 9 female	23 male – 2 female
	58 % younger than 30 years	80 % younger than 30 years
	100% Sub-Sahara Africa	100% Sub-Sahara Africa
	Ø 6.4 years of school	Ø 2 years of school
Increase n° (Aug.'16)	+ 10 asylum seekers	<i>no increase</i>
	41 male – 9 female	
	92 % Sub-Sahara Africa 8 % Pakistan	
Volunteers	36	20
First decisions in April/May 2017:	8 humanitarian protection 28 with neg. answer (appeals) 14 without decision	10 humanitarian protection 1 subsidiary protection 14 with neg. answer (appeals)

# Working experiences in Italy

## Malles

- April 2017:
  - 43 of 50 asylum seekers could gain working experience during their stay in South Tyrol
  - 19 were working
- Main areas:
  - Agriculture (seasonal harvester, gardener)
  - Voluntary work (municipality)
  - Tourism (kitchen assistant, cleaner, barkeeper)
  - Industry (factory worker)
  - Handicraft (carpenter, welder)

*„Most of our house guests found a job thanks to the commitment of our volunteers.“*

**Coodinator reception centre Malles**

## Ortisei

- March 2017:
  - 24 of 25 asylum seekers could gain working experience during their stay in South Tyrol
- Main areas:
  - Tourism (kitchen assistant, cleaner, dishwasher, receptionist)
  - Agriculture (seasonal harvester, gardener)
  - Voluntary work (municipality, retirement home)
  - Services (Babysitter, supervisor)

*„The job search occures through the coordinator and the staff of the house.“*

**Integration Adivisor Ortisei**

# Actor's constellation – local networks

## Central actors

### Top-down (CAS-System):

- Province, Social office, Employment office, Education
- NGO's (> coordinator and staff of the reception facilities)

### Bottom up:

- Municipality, Social/integration advisor, mayor
- Volunteers, population, associations, enterprises, trade associations

## Network measures

### Density

- Number of possible relations (0-1) between the actors and/or group of actors

### Reciprocity

- Assumption: symmetric network, mutual relationships

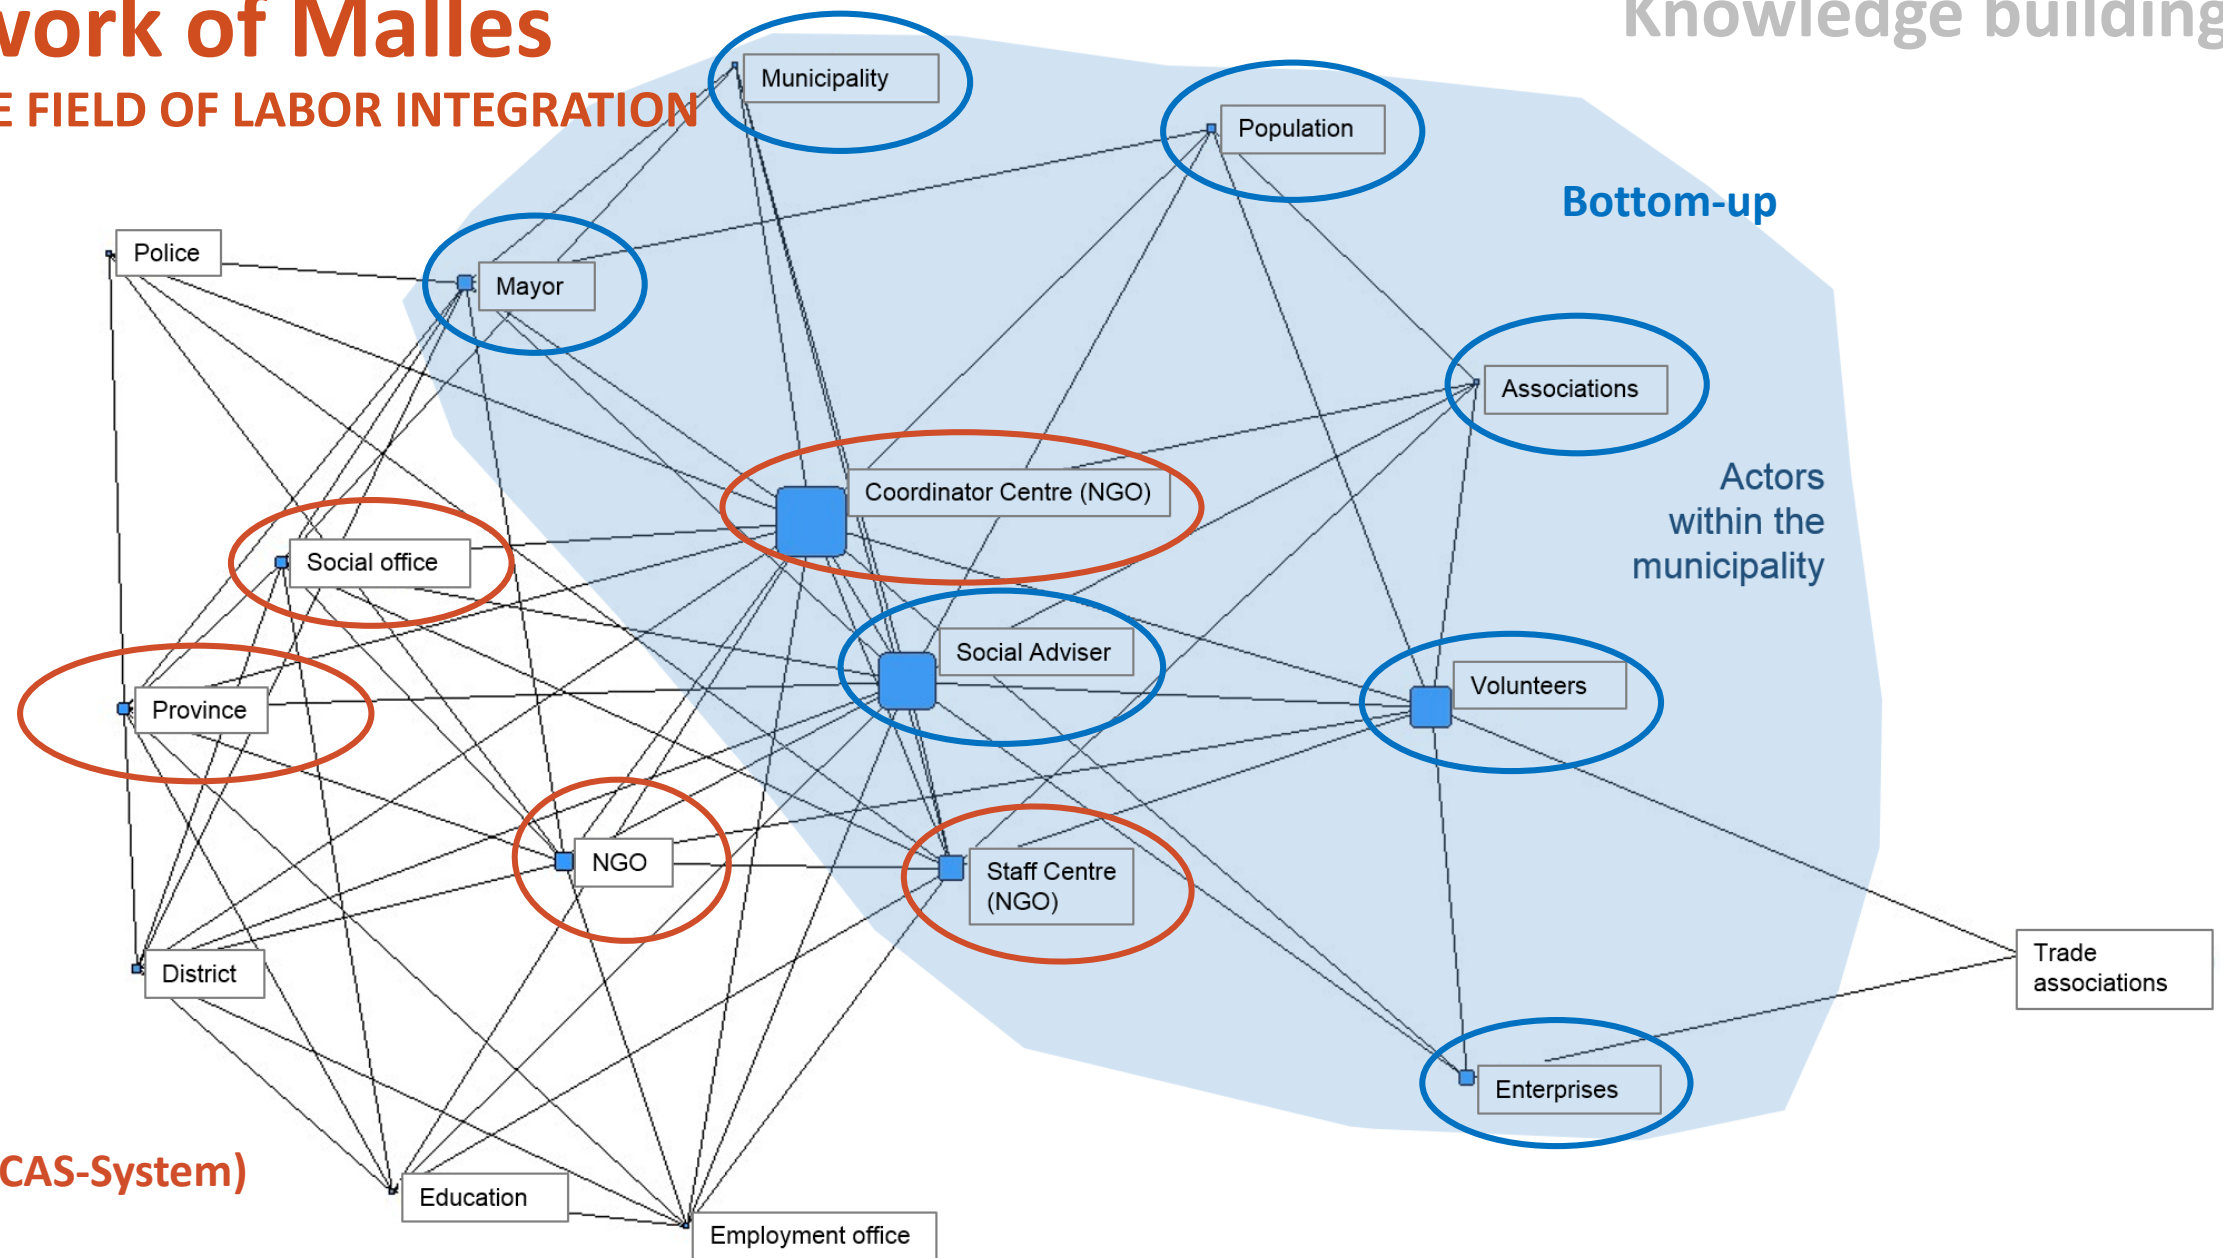

### Centrality

- Average degree:  $\bar{d}$  n° of relations of each node (=actor/group of actors)

# 3. Conclusion

- Both realities are interlinked with diverse governance levels
  - The connection of the houses (NGO) with the local reality is crucial
  - Asylum seekers depend strongly on the local (social) network and engagement of diverse municipal actors (i.e. volunteers)
  - Social networks **help to enter the labor market**
    - Social capital as a potential to reduce inequalities
    - Access to social capital can also create inequalities inside the target group „asylum seekers“ , f.e. courses on work safety.
  - Additional advantage in APoB: good situation on the labor market > demand for labor force
- Prior involvement (early integration) and access to the labor market reduce the burdens after getting a positive status

# 3. Conclusion

Social capital depends on the actors / group of actors:

- Potentials
- Competences
- Resources
- Ties / relations

Diverse environment:

- Spatial proximity
- Culture
- Values
- Norms

**How can we manage a (potential) network  
to support the labor integration of asylum seekers  
(LT rec. refugees, immigrants)?**

**Thank you!**
